

RE: Ultra Shield Race Products, Harness, Post Recall Updates.

Ultra Shield Race Products, LLC has a recall out on All **3" Black** Webbing Harnesses as well as all Camlock Belts with a specific buckle. All of the belts affected had a Dec 2022 Expiration date on the SFI tag. In order to distinguish the belts that still need to be returned for the recall and the ones that have been **updated** to SFI requirements and are not needing to be recalled, **we are writing the Date of Manufacture (DOM) on the SFI tags for belts that meet the SFI 16.1 criteria.** This will be on all SFI tags until the expiration date changes to June 2023. Please see the picture below as an example. As well the Camlock Buckles will have either Silver Screws, or Black Hex Drive (Allen) Screws that meet the specification.
